

BREEDING SHEEP FROM AUSTRIA

Breeding sheep from Austria fulfil the highest standards of animal health and breeding quality. Around 45,000 breeding animals are kept on around 4,000 herd book farms. Apart from the tested performance data of the animals, the many years of experience of our own committed breeders is incorporated in breeding value estimates today. Thus Austrian breeding sheep are high-performing, fertile and of traceable/tested origin.

Breeding sheep from Austria are regularly tested and are guaranteed to be **free of**

- Maedi/Visna
- CAE
- Scrapie/TSE
- Brucellose

ARE YOU INTERESTED IN SELECTED BREEDING SHEEP FROM AUSTRIA?

We organise the export of high-quality breeding animals to the following countries:

MERINOLANDSCHAF MERINO LANDSHEEP

The Merinolandschaf has a non-seasonal oestrous cycle, a very good fertility and milking performance and outstandingly good growth rates with a high meat performance. It is particularly well suited to being kept in pens.

PERFORMANCE DATA:

Fertility:	1,8 - 2,5 lambs per annum
Age of first lambing:	18 months
Yearling weight ram:	80 kg
Yearling weight ewe:	60 kg
Old ram:	120 - 150 kg
Ewes:	80 - 100 kg

SPECIAL CHARACTERISTICS:

- Good musculature with very good formation of value-determining parts
- exceptional readiness to high performances
- very persistent in marching

TIROLER BERGSCHAF TYROLEAN MOUNTAIN SHEEP

The Tiroler Bergschaf has a non-seasonal oestrous cycle, a very good fertility and milk performance with good mothering instincts. As a result of its surefootedness, it is particularly well suited to wide ranging mountain pastures. At an early to medium breeding age it is particularly well suited as a mother for lamb production with meat races.

PERFORMANCE DATA:

Fertility:	1,8 - 2,5 lambs per annum
Age of first lambing:	18 months
Yearling weight ram:	70 kg
Yearling weight ewe:	60 kg
Old ram:	100 - 150 kg
Ewes:	85 - 120 kg

SPECIAL CHARACTERISTICS:

- very vigorous and fit
- high fertility
- correct and dry foundation

JURASCHAF JURA SHEEP

The Juraschaf is a non-seasonal, early-maturing and fertile sheep with a high share of multiple births and very good mothering instincts. It has a robust and strong constitution, it is resilient even given mediocre feed and keep conditions, suitable for Alpine pastures and loyal to its site.

PERFORMANCE DATA:

Fertility:	1,8 - 2,5 lambs per annum
Age of first lambing:	18 months
Yearling weight ram:	70 kg
Yearling weight ewe:	60 kg
Old ram:	100 - 150 kg
Ewes:	60 - 85 kg

SPECIAL CHARACTERISTICS:

- excellent mothering instincts
- ease of lambing
- with the correct feeding, marketable full-meat carcasses can be reached at an age of 4 months
